Leonardo Morales Belluzzi

Architecture Coordinator | Systems Specialist

Sao Paulo, Brazil | +55 11 94682-0009 | leonardo.belluzzi@gmail.com | linkedin.com/in/leonardo-belluzzi

What I Bring

Technology professional with 10+ years of experience in software engineering, architecture, and technical leadership across insurance and financial services. Currently part of an architecture team, guiding squads on implementation standards and sustainability while coordinating initiatives in security, DevOps, and observability. Strong background in full-stack development, AWS cloud-native architecture, production support, and modernization initiatives.

Progressed from intern to architecture coordinator by combining hands-on development, operational ownership, and technical leadership. Experienced in translating business needs into scalable architecture decisions, reducing delivery risks through engineering standards, and enabling teams with practical governance.

Technical Stack

- Backend: Java, Spring Boot, Spring MVC, Spring Data, Spring Security, Java EE, EJB, Hibernate, PL/SQL, Node.js.
- Frontend: JavaScript, TypeScript, AngularJS, Angular Material, JSF, JSP.
- Cloud: AWS (EC2, S3, SQS, Lambda, ECS, EKS, Fargate, API Gateway, DocumentDB).
- Data: Oracle, PostgreSQL, MongoDB, SQL Server, ArangoDB.
- Messaging and Integration: ActiveMQ, RabbitMQ, SOA, BPEL, WebServices, EDI flows.
- DevOps and Observability: Jenkins, Groovy, Git, SVN, CI/CD pipelines, monitoring and logging practices.
- Additional Exposure: LLM ecosystem topics, prompt orchestration, agent frameworks, MCP concepts, and evaluation frameworks.

Education & Courses

Education

- University of Sao Paulo (USP) — São Paulo, Brazil: Bachelor's Degree in Information Systems | Jan 2012 – Jul 2019.
- Instituto Técnico Brasilio Flores de Azevedo — Barueri, Brazil: Technical High School Program (Software Development Focus) | Jan 2009 – Dec 2012.
- FATEC - São Paulo, Brazil: Bachelor's Degree in Systems Analysis and Development | Jan 2024 – Jul 2026.

Courses and Languages

- MongoDB University: MongoDB Basico, MongoDB for Java Developers.
- Udemy: PL/SQL, Java, JSF, Oracle Database.

- Caelum/Alura: C#, ASP.NET.
- Languages: Portuguese (Native), English (Professional working fluency).

Professional Experience

Caixa Residencial

Architecture Coordinator | Sep 2024 – Present

- Lead technical direction for architecture and software engineering teams, balancing operational needs with strategic goals.
- Guide teams on implementation standards, reliability practices, and sustainable engineering decisions.
- Coordinate initiatives across security, DevOps, monitoring, and platform evolution.
- Support stakeholder alignment and delivery governance for strategic initiatives with predictable quality and lower risk.

Stack: Spring Boot, Oracle, MongoDB, Git, EC2, Lambda, ECS, EKS, Fargate, DocumentDB, S3, API Gateway, Jenkins, Groovy, Docker.

Caixa Residencial

Systems Specialist | Sep 2022 – Sep 2024

- Provided technical leadership in architecture-driven projects involving development and infrastructure teams.
- Supported strategic initiatives such as Open Insurance, digital signature capabilities, and quoting engines.
- Modeled backend, frontend, database, and service architecture with focus on AWS microservices and security best practices.
- Led architecture discussions with cross-functional teams to align business priorities, constraints, and delivery plans.
- Supported cloud adoption and platform evolution, driving best practices in code quality, security, and deployment automation.

Stack: Java, JSF, JSP, EJB, Spring Boot, Spring MVC, Spring Data, Spring Security, Lombok, Hibernate, PL/SQL, Node.js, TypeScript, Oracle, MongoDB, JBoss, WildFly, ActiveMQ, OAuth 2.0.

Tokio Marine Seguradora

Senior Systems Analyst | Nov 2020 – Sep 2022

- Worked on production support and evolution of residential insurance quotation, acceptance, inspection, and issuance systems.
- Partnered with Product Owner and business teams in analysis, prioritization, and delivery of technical solutions.
- Contributed to architecture design, feature implementation, and incident response.
- Handled high-priority production incidents, coordinating troubleshooting and restoration with technical teams.

Qintess

Systems Analyst | Sep 2020 – Nov 2020

- Worked on functional requirements for insurance analysis, approval, and issuance workflows.
- Participated in rollout of XS3 issuance services in partnership with Tokio Marine and Caixa Economica Federal.
- Supported implementation and go-live activities to ensure operational continuity during delivery.

TRMS

Junior to Mid-Level Systems Analyst | Feb 2017 – Sep 2020

- Performed requirements analysis, use case definition, Java development, and production support.
- Contributed to a cryptocurrency e-commerce platform using Spring architecture and PostgreSQL.
- Supported insurance platform sustainment projects using Oracle, SOA/BPEL, and Java.

- Acted as developer and technical lead in initiatives with Spring Boot, Docker, Kubernetes, Jenkins, RabbitMQ, and Keycloak.

4Win Tecnologia da Informacao LTDA

Intern to Junior Systems Analyst | Jan 2013 – Nov 2016

- Worked on requirements gathering, use case modeling, and software development with Java, .NET, Oracle, and SQL Server.
- Participated in process quality initiatives, including MPS-BR implementation (levels F and E).
- Contributed to migration and integration projects for financial services clients.
- Supported project transitions from legacy platforms to newer application servers and architecture standards.
